

Equine Sun Visor Measuring Guide

(Also for ESV Plus & ESV MAXX)

- A. Distance from center between ears (not poll) to line between tear ducts of both eyes
- B. Distance from center between ears to mid face just in front of cheek bone
- C. Distance between tear ducts of both eyes
- D. Circumference around mid face under jaw just in front of cheek bone
- E. Half of circumference from the poll to under jaw (not neck)
- F. Nose cover: Distance from center between the ears (not poll) to where you want the cover to end.
 - The chart will show the default length for nose covers, however, if you'd like it longer or shorter, we can do that for you. Please contact us via e-mail, reference your order number, and let us know what length you'd like it to be. E-mail to: dale@equinesunvisor.com.
